

# Yufu City Flood Hazard Map Yufuin Town Edition

**About the Flood Hazard Map**

- Based on the designated flood area issued by Oita Prefecture, this map indicates the predicted range of flooding when rivers overflow due to heavy rain, the depth of the flood water, evacuation sites, dangerous locations when evacuating, etc.
- Based on regulations of the Flood Control Act, this map predicts the maximum envisaged amount of precipitation and shows the envisaged flood conditions if rivers overflow.
- The actual flood area and depth may differ from the map predictions. Also, due to unpredictable intensive rainfall, flooding of small rivers, flood inundation, etc., may result in flooding in areas outside of the scope of the map. Always be careful.
- It is not always necessary to evacuate to the designated evacuation site. If the evacuation site, roads, or surrounding areas are flooded, please evacuate to a nearby tall building or high ground.
